# decay

## Across

- 2 second stage of decomposition
- 6 chemical also released by decay
- 7 first insects to colonize dead body
- 8 body consuming itself
- 9 first stage of blow fly offspring after egg
- 12 life stage before adult fly
- 14 first stage of blow fly infestation
- 15 short for post mortem interval
- 17 stage of body in which blood clots internally
- 20 accumulated time multiplied by temperature to track development of insects

## Down

- 1 first stage of death, decomposition
- 3 third stage of decomposition
- 4 4th stage of decomposition
- 5 chemical released by decay
- 10 time since moment of death
- 11 life stage prior to pupation
- 13 mass of maggots in decaying body
- 16 stage of body in which muscles become stiff
- 18 first known user of entomology to solve crime
- 19 study of insects
